

# TEXAS ENA

## A BIG THANK YOU TO OUR TEXAS DELEGATES!

We want to extend our heartfelt thanks to all of the Texas Delegates for their incredible dedication and hard work. Each of you played an essential role in making this delegation a success. Your contributions truly made a difference, and we couldn't have achieved such a productive outcome without you. Thank you for being a vital part of this amazing team!

# ITS YOUR TIME

It's your time! Have you considered running for a state office but said "I'm too busy" or "it's not the right time? Put these thoughts aside and replace with "if you want something done, give it to a busy person", and "it's never a good time, but it's MY time". Texas ENA is a great organization that needs people like you to grow and thrive. Positions open on the 2025 ballot are: President-Elect, Treasurer-Elect, & Director x 2. Don't be afraid! There are plenty of previous officers and the Council of Presidents to support you. You are never alone. To apply, go to: <https://txena.org/resources/> Scroll to Texas State Council Officer Application.

## CANDIDATES WHO SAID YES

### TREASURER-ELECT

### COURTNEY EDWARDS

Dear Members,

I am honored to submit my candidacy for the position of Treasurer Elect. My desire to serve stems from a deep commitment to the continued growth and healing of our organization, especially in the wake of the challenges we've faced over the past several years. I believe that through transparency, accountability, and collaboration, we can restore trust and build a stronger financial future for Texas ENA. With longstanding ties to this organization and its members, I consider this role not just a personal commitment, but a true privilege. Integrity is a core value that guides both my professional and personal life, and I intend to bring that same principle—along with a strong sense of organization and responsiveness—to the role of Treasurer-Elect. I respectfully ask for your support and the opportunity to serve you with diligence, care, and unwavering honesty.

Sincerely,

Courtney Edwards DNP, MPH, RN, CCRN, CEN, TCRN, NEA-BC, FAEN

# DIRECTOR AMY TUCKER

I have grown as a nurse and an educator over the last few years being involved in ENA at the local and national level. I routinely attend the state meetings as a delegate and provide chapter reports for Dallas County. I also assist with pediatric readiness in my region. I would like to be more involved at the state level and continue to learn from the amazing nurses, educators, and leaders throughout Texas working in emergency nursing.

Thank you.

Amy Tucker, DNP, RN, CCRN, TCRN

We look forward to receiving YOUR application!

Sincerely,

Yvonne Moseley RN, MSN, CEN

Council of Presidents Committee Chair

# ED MANAGEMENT OF PLACENTAL ABRUPTION

Shelly Revilla, BSN, RN, CEN, NPD-BC  
Member, Professional Education Committee

Placental abruption, or *Abruptio placentae*, is a condition in which the placenta separates from the uterine wall prior to birth of the fetus, disrupting maternal-fetal circulation. This condition is most common in the second and third trimesters, when the placenta loses elasticity. While there are many causes to placental abruption (smoking, high parity, drug use, etc.), blunt force trauma, pelvic fractures, and acceleration/deceleration forces are especially high risks. Placental abruption is the second most common cause of fetal death in the pregnant patient (Stevenson, 2023).

**Because ultrasound has poor sensitivity for diagnosing placental abruption, a CT should be considered for confirmation (Qiu et al., 2021).**

## FOR MOM:

- Partner with L&D to run TOCO strips early.
- Consult OB early
- If maternal shock present, blood products and TXA
- Postpartum, uterotonics such as Pitocin, Methergine, or Hemabate
- DIC treatment such as cryoprecipitate, if applicable

## SIGNS AND SYMPTOMS

- Dark red vaginal bleeding (unless concealed)
- Abdomen/back pain
- Uterine irritability/rigidity
- Maternal shock
- Fetal distress (i.e. HR <110 or >160)
- Rising fundal height
- DIC (could present up to 48 hrs after)

## FOR BABY

If fetal life is present, an emergency C-section would be indicated. Ensure that OB and a neonatologist are consulted early. Surgery would ideally be in the OR. Ensure neonatal resuscitation equipment is on hand.

Stevenson, J. (2023). The pregnant trauma patient. In *Trauma Nursing Core Course (TNCC)*. (9th ed., pp. 335-336). Emergency Nurses Association.

Qiu, Y., Wu, L., Xiao, Y., & Zhang, X. (2021). Clinical analysis and classification of placental abruption. *The Journal of Maternal-Fetal & Neonatal Medicine*, 34(18), 2952-2956. <https://doi.org/10.1080/14767058.2019.1675625>

# HI PLAINS CHAPTER

Our chapter had a successful 2024 with the most nominations for officers in over 5 years! We were excited to add some new faces to the officers for this year! See below.

We had two delegates attend the January General Assembly in McAllen and two Past Texas Presidents attend virtually. Our President participated in the 2025 Leadership Orientation.

Our first chapter meeting of 2025 was held at a restaurant in February and CNE was provided. We would like to thank and recognize Kelli Keith with Fisher and Paykel Healthcare. She did a Nasal High Flow presentation and provided the CNE.

In April we provided a TNCC course for 21 nurses in our region. We work with our local RAC to sponsor 4 people from each of the hospitals in our region. Also in April, one of our members presented at Covenant Children's Hospital's 12th Annual Child Abuse Conference in Lubbock.

We had several members attend the April TXENA Committee meetings on Friday. Two delegates attended the General Assembly in Tyler and one Past Texas President attended virtually. Two of our members were successful in obtaining items from the Texas ENA Auction!
